

February 2010

Dear EMS Partners:

The Michigan Office of Highway Safety Planning (OHSP) is currently developing the FY11 State Highway Safety Plan. In recent years, we've been working to increase the EMS presence in Michigan's traffic safety programs. As part of this effort, OHSP is conducting this brief survey to identify any equipment and/or training needs that would assist EMS partners when responding to traffic crashes.

Please take a moment to respond to the few questions below and return the survey by Friday, March 5<sup>th</sup>. If you have any questions, please feel free to contact Alicia Sledge, OHSP Program Coordinator at (517) 333-5321 or at [sledgea@michigan.gov](mailto:sledgea@michigan.gov).

Thank you.

1. Is your agency in need of specialized rescue or extrication equipment that would assist when responding to traffic crashes?  Yes  No

If so, what type of equipment is needed (i.e. hydraulic extrication tools, air bag lift systems, etc...)?

---

---

2. Is your agency in need of EMS training that would assist when responding to traffic crashes?  Yes  No

If so, what training would be useful (i.e. community Bystander Care training, etc...)

---

---

3. Are there other EMS needs that would assist when responding to traffic crashes? If so, please list them below.

---
